PHARMA CLEAN ROOM & DOORS

COMPANY & COLLECTION

A coordinated approach.

Doors, panels and fabricated components planned around your project.

Pharma Door India Pvt Ltd brings together cleanroom doors, PUF panel systems, observation windows and sheet metal solutions for industrial spaces. Based in Vadodara, our focus is on practical product selection, coordinated detailing and a consistent finish.

APPLICATION SECTORS

Pharmaceutical / Hospital & OT / Food / Chemical / Ayurvedic / Herbal

DOOR SYSTEMS / 01

Single leaf pharma doors

A clean, simple entrance for personnel movement and room access.

Illustrative product render. Final construction follows the approved project specification.

Product highlights

Flush door appearance for a coordinated panel interior.

Single leaf arrangement with the opening direction selected to suit the room layout.

Vision glass and hardware positions detailed before manufacture.

Select your configuration

Solid shutter or one vision window.

Rectangular, square or circular glass layout, subject to feasibility.

Lever handle or D pull handle; closer and lock selection to suit operation.

FOR YOUR ENQUIRY

Share the wall opening, wall thickness, clear passage required, opening direction, vision window size, finish and hardware preference.

DOOR SYSTEMS / 02

Double leaf pharma doors

A wider passage for equipment, trolleys and material movement.

Illustrative product render. Final construction follows the approved project specification.

Product highlights

Paired shutters create a wider access opening.

Equal or unequal leaf arrangement can be discussed for the equipment route.

Coordinate the active leaf, inactive leaf and hardware as one assembly.

Select your configuration

Solid shutters or a vision window in each leaf.

Leaf split and opening direction to match the layout.

D handles, closers and inactive-leaf locking arrangement as specified.

FOR YOUR ENQUIRY

Send the largest trolley or equipment dimensions, opening size, leaf split, sill condition, opening direction and daily operating requirement.

PANEL SYSTEMS / 01

PUF sandwich panels

Insulated modular panels for planned wall and enclosure layouts.

Illustrative product render. Final construction follows the approved project specification.

Product highlights

Sandwich construction with metal skins and a polyurethane foam core.

Panel layout coordinated with doors, windows and service penetrations.

Edges and junctions planned for a continuous interior finish.

Specify your panel

Panel thickness and insulation requirement.

Skin material, sheet thickness and colour finish.

Panel lengths, joint arrangement and required cut-outs. Final values are set in the quotation.

FOR YOUR ENQUIRY

Share room dimensions, required panel thickness, surface material, quantities, application, service cut-outs and installation location.

PANEL SYSTEMS / 02

Partitions & ceilings

Bring walls, ceiling lines and openings into one coordinated layout.

Illustrative product render. Final construction follows the approved project specification.

Wall partitions

Plan panel divisions around the room layout.

Coordinate internal corners, wall-to-floor coving and junction trims.

Integrate door and observation-window openings into the panel schedule.

Ceiling coordination

Confirm support locations and suspension details with the project team.

Coordinate light, duct and filter openings before production.

Ceiling access and any imposed loads require a separately approved support design.

FOR YOUR ENQUIRY

Provide the layout drawing, room height, ceiling area, support details and coordinated lighting / HVAC opening schedule.

VIEW PANEL SYSTEMS

Flush observation windows

Clear sight lines between spaces with a neat wall interface.

Illustrative product render. Final construction follows the approved project specification.

Product highlights

Observation glazing integrated into the partition layout.

A flush appearance supports a consistent wall finish.

Dark border detailing can be coordinated with the door vision glass.

Select your glazing

Overall window size and visible glass area.

Single or double-glazed construction, subject to the agreed design.

Glass type, thickness, border width and frame finish confirmed for each project.

FOR YOUR ENQUIRY

Send the opening width and height, wall thickness, glazing preference, border design and any privacy or visibility requirement.

DOOR HARDWARE & ACCESSORIES

Every detail matters.

Choose the operating hardware together with the shutter and frame.

One coordinated door assembly.

Frame, shutter, seals, vision glass and hardware should be reviewed together before production.

HINGES

Hinge type, quantity and reinforcement matched to shutter size and weight.

HANDLES & LOCKS

D pull handles, lever handles and locking arrangements selected for the access requirement.

CLOSERS & SEALS

Closer operation, perimeter gasket and bottom seal details coordinated for the application.

ADDITIONAL HARDWARE

Kick plates, flush bolts and access-control preparation discussed where required.

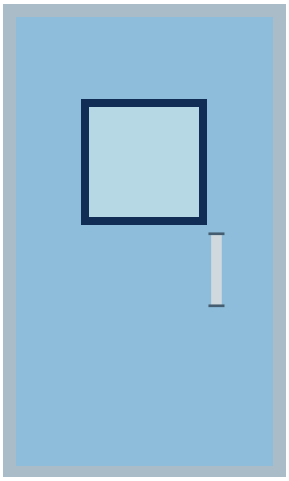
HARDWARE SCHEDULE

Specify the door quantity, leaf size, usage, handle choice, locking requirement and any access-control interface. Final hardware makes and models follow the quotation.

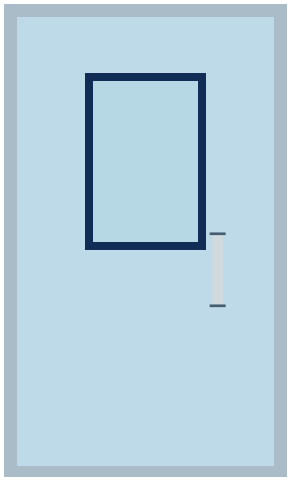
DOOR COLLECTION / DESIGN OPTIONS

Choose your door style.

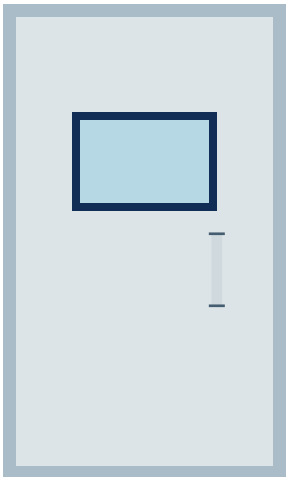
Illustrative elevations for discussing glass, colour and handle placement.



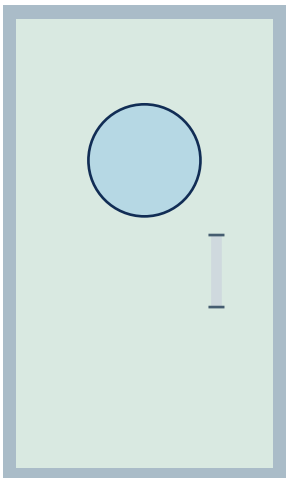
Square vision



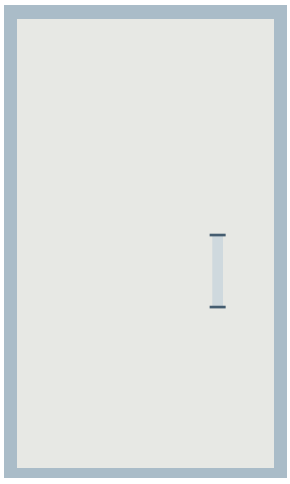
Vertical vision



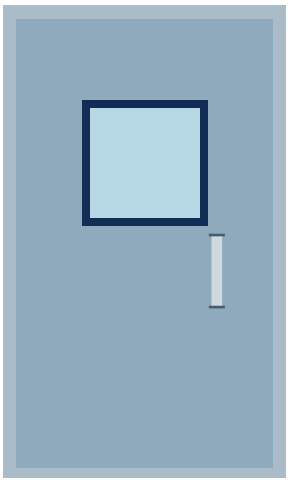
Wide vision



Circular vision



Solid shutter



Alternate finish

Colour and glass combinations are shown as design references. Actual shade, glazing construction and hardware are agreed against the approved drawing and physical finish sample.

MANUFACTURING SOLUTIONS

Precision sheet metal work

Fabricated parts and formed components built around approved drawings.

Illustrative product render. Final construction follows the approved project specification.

Work scope

Laser-cut profiles and sheet metal blanks.

Bent sections, door frames and formed components.

Custom fabrication for coordinated cleanroom and industrial assemblies.

Drawing-led manufacture

Review material, sheet thickness and finish before cutting.

Confirm bend geometry, hole positions and assembly interfaces.

Agree critical dimensions and tolerances in the drawing or purchase specification.

FOR YOUR ENQUIRY

Send DXF / DWG / PDF drawings, material grade, thickness, quantities, finish and critical tolerances. Production scope is confirmed in the offer.

TURNKEY PROJECT COORDINATION

From layout to handover.

A defined scope helps doors, panels and site work come together.

01 **Understand the project**

Room layout, usage, access routes and product quantities.

02 **Coordinate the drawings**

Door schedule, panel divisions, glazing and service interfaces.

03 **Confirm the scope**

Materials, finishes, hardware, supply and installation responsibilities.

04 **Manufacture & supply**

Approved drawings guide fabrication and product preparation.

05 **Install & review**

Coordinate site readiness, fitment and final snag review as contracted.

DEFINE THE BOUNDARIES EARLY

Civil work, HVAC, electrical work, controls, validation and specialist testing are included only when explicitly agreed in the project offer.

START YOUR NEXT PROJECT

Let us build your brief.

Share your layout and product schedule for a coordinated proposal.
